

Leadership Profile

Dave Kievet
Group President, California Operations

Over the past several years, Boldt's entry into California and its surrounding markets owes much to Dave.

Dave brings more than 25 years of varied construction management and field experience to Boldt customers, with market knowledge encompassing everything from health care to heavy industrial. Perhaps even more importantly, he delivers a passion for innovation.

For the last dozen years or so, Dave has worked to develop a range of Lean concepts for construction, implementing and integrating them into every project he oversees. His goal is to increase the total efficiency of the project delivery process, ideally saving the project owner time and money while improving quality outcomes and safety.

He's led some of the largest Boldt projects to date, and is actively involved with several of the US's most far-reaching health care projects, utilizing the Integrated Lean Project Delivery® (ILPD®) method.

Dave is a graduate of the University of Wisconsin, with a BS in construction administration.
